

Cemeteries with Nightlife

With the expansion pack "The Sims 2 Nightlife" our sims can manage the tombstones and can move the minto community lots. This new feature allow the creation of special lot where gathering all neighbourhood's tombstones, so we can obtain a real cemetery.

This guide explain how move tombstones from a residential lot to the cemetery. First of all you need a community lot, for example you can find a Cemetery, community lot, on our site, Sims2Cri http://www.sims2cri.com/eng_lots_com_05.php. Download this or another lot you want, or if you prefer create it before continue.

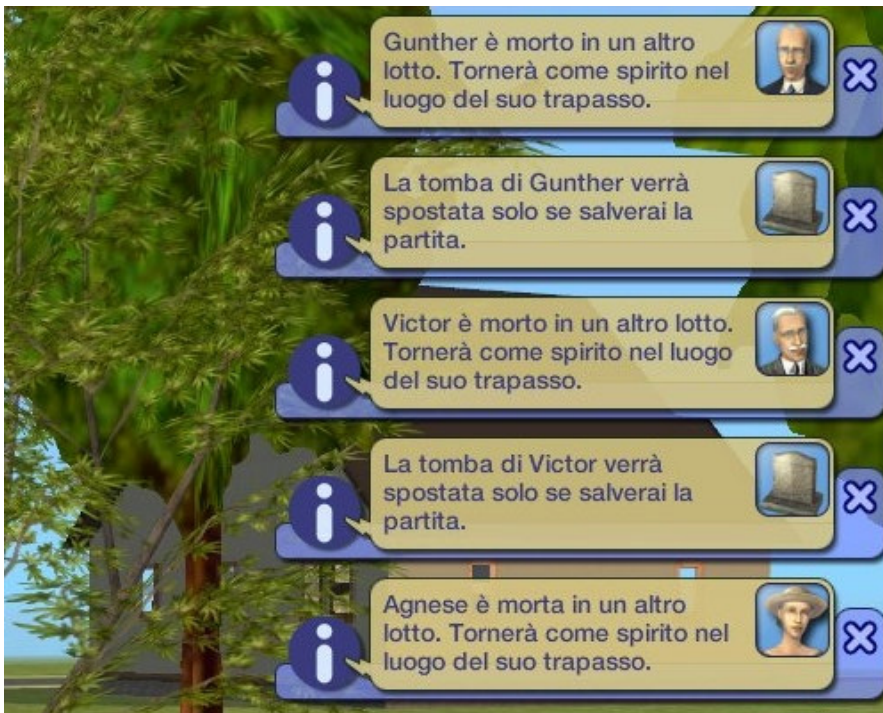

Now it's time to enter the residential lot where we have a tombstone to move. We enter the Goth family for example.

Just click on a tombstone/urn and you can get the options: "Move this tombstone" or "Move all tombstones".

After click one of these actions, a pop-up will appear. The game now ask us where we want move our tombstones. Just select one neighbourhood or sub neighbourhood, a community lot, and click "V" to confirm.

Now wait for load the transfer, at the end of process you get a confirm message as these below.

Save the game and the tombstones will be moved into Cemetery lot.

At this point you can come back to neighbourhood and load the Cemetery lot. In fact, the tombstones were been moved here, but in a casual order. So, if you load the community lot and go to the buy/build mode you can place them in your desired position.

Finally sims can complain their dear without inconvenient ghosts in their house, when you want that sims visit their dead, just go to the Cemetery lot instead an usual community lot for shopping ;).
